

ABOUT THE CLUB

1) What is the Coding Ninjas 10X Club at SRM Institute of Science and Technology?

The Coding Ninjas 10X Club is a student-led technical community that promotes innovation, coding, teamwork, and leadership through workshops, hackathons, and flagship events.

2) Why should a first-year student join Coding Ninjas 10x club?

Joining Coding Ninjas 10X Club gives first-year students the opportunity to learn new skills, work on exciting projects and events, build meaningful connections, and grow both personally and professionally in a collaborative environment.

3) What is the primary objective of the Coding Ninjas 10X club?

The primary objective of the Coding Ninjas 10X Club is to create engaging, impactful events that foster learning, innovation, collaboration, and a strong technical community on campus.

4) What events do Coding Ninjas 10X organize throughout the year?

2, CAD (Ctrl+Alt+Delete) and CampusQuest

5) What skills can members develop by being part of the club?

Members can develop technical skills, problem-solving abilities, teamwork, leadership, communication, event management, and project development skills while collaborating with like-minded peers.

6) Besides coding, what other opportunities does the club provide?

Beyond coding, the club offers opportunities to organize and manage events, work on corporate collaborations and partnerships, develop leadership and communication skills, and gain hands-on experience in planning and executing large-scale initiatives.

7) What makes Coding Ninjas 10X different from other technical clubs?

Coding Ninjas 10X stands out through its focus on large-scale, experience-driven events that go beyond conventional workshops and coding contests. Members get the opportunity to plan, execute, and innovate while working alongside a close-knit community that values creativity, ownership, and continuous growth.

8) Do technical applicants need to showcase personal projects?

No, showcasing personal projects is not mandatory. However, having projects to demonstrate your interest, skills, and initiative is always appreciated.

9) What is the recruitment process for the Coding Ninjas 10X Club?

The recruitment process begins with a Google Form application, followed by a personal interview for shortlisted candidates.

10) How can I get promoted to higher positions at coding ninjas club?

Show up in the club regularly, contribute your ideas and take initiatives in club activities and take up opportunities as team leads and for promotions

11) How can I stay updated about the club activities?

You can stay updated on all our events, recruitments, workshops, and announcements by following our Instagram page, [@srm_cn](#).

12) Are there opportunities to lead projects or events?

Yes. Active members who consistently demonstrate initiative, responsibility, and leadership are given opportunities to lead projects, organize events, and take on greater responsibilities within the club.

13) What are all the domains in technical and non - technical part of the club?

Technical domains: Web development, App development, AI/ML

Non-technical domains: Corporate, Creatives, Sponsorship, Editorial

14) Can members switch domains after joining?

Domain switching is not permitted after joining. However, members can contribute to and be a part of multiple domains based on the club's requirements and their interests.

15) Can club members work with students from different domains?

Yes, cross-domain collaboration is encouraged for projects and events.

16) Can students from non-CSE branches join the Coding Ninjas 10X Club?

Yes, students from different branches can contribute based on their skills and interests.

17) Can I join the club even if I have no prior club experience?

Yes, prior club experience is not necessary; willingness to learn and contribute matters more.

18) Does Coding Ninjas 10X conduct workshops for beginners?

Yes, the club conducts workshops and sessions suitable for both beginners and experienced students.

19) Can I take part in organizing events as a club member?

Yes, members actively participate in planning, managing, and executing club events.

20) Does the club provide opportunities to collaborate with companies or industry professionals?

Yes, the club has collaborated with established sponsors such as Untech and other industry partners. We are also working towards creating industry connections and internship opportunities for students.

21) What kind of experience can I gain from working in the club?

You gain practical experience in teamwork, event management, technical projects, and professional communication.

22) How does the club help students improve their communication and leadership skills?

Members improve these skills by coordinating teams, managing tasks, and taking responsibility during events.

23) What are the professional expectations from a Coding Ninjas 10X club member?

Members are expected to be responsible, respectful, proactive, and professional in their work.

24) What are the club's expectations regarding punctuality, communication, and commitment during events?

Members are expected to be punctual, communicate clearly, and complete assigned responsibilities on time. Clear communication and timely completion of tasks are essential for smooth team coordination.

25) Can technical members collaborate across AI/ML, Web Development, and App Development?

Yes, technical domains often collaborate when projects require skills from multiple areas.

26) What tasks are usually assigned to AI/ML members during club activities?

AI/ML members work on models, automation, data-based projects, and AI features for club projects.

27) What kind of work does the Web Development domain handle for the club?

The Web Development team builds and maintains websites, event pages, and other web-based projects.

28) What does the App Development domain contribute to the club?

The App Development team works on mobile applications and app-based solutions for projects and events.

29) What does the Sponsorship domain actually do when preparing for an event?

The Sponsorship team identifies potential sponsors, prepares proposals, and manages sponsorship collaborations.

30) How does the Sponsorship team approach and communicate with potential sponsors?

They approach companies professionally through cold emails, calls, LinkedIn, and sponsorship proposals.

31) What kind of responsibilities does the Corporate domain handle?

Corporate handles event planning, coordination, operations, communication, and overall event management.

32) What tasks are usually assigned to Corporate members while organizing an event?

They manage registrations, logistics, participants, schedules, coordination, and on-ground execution.

33) What does the Creatives domain work on for organizing events?

Creatives handles posters, certificates, social media designs, branding, visual themes, and other event graphics.

34) What kind of creative tasks are given during major club events?

Members may design posters, banners, Instagram content, certificates, merchandise, and event branding.

35) Which domains usually work together when organizing a major club event?

Every domain contributes equally, with everyone working together and supporting each other to ensure everything runs smoothly.

36) How does a project move from an initial idea to execution across different domains?

The event process begins with understanding the event, selecting a trending theme, and brainstorming rounds and activities with member inputs through GForms. Teams then handle execution, décor, promotion, and registrations to successfully conduct the event.

37) How does the Corporate team coordinate with Creatives for Instagram content?

The Corporate team can collaborate with the Creatives team whenever they need help with edits or creative inputs.

38) What kind of tasks and responsibilities are typically assigned to new members during their initial days in the club?

New members are usually introduced to basic responsibilities such as preparing MOMs after being guided on the process, and documenting and elaborating on any event ideas or concepts they suggest for further discussion and development.

39) How does the club ensure that tasks are properly communicated and handed over between different teams?

Tasks are communicated through meetings, discussions, and documented updates. For online meetings, MOMs are maintained to record decisions, progress, and responsibilities, keeping everything updated for better understanding and smooth handovers.

40) If I have skills that fit multiple domains, how can I contribute outside my primary domain?

Members can first discuss this with their Domain Associate, who can connect them with the relevant Associate from another domain to coordinate responsibilities and find suitable opportunities to contribute.

41) What is the tenure structure of Coding Ninjas 10X Club?

The club operates in one-year tenures, with a new recruitment cycle conducted for the incoming tenure.

42) How is a member's contribution evaluated throughout their tenure?

Members are evaluated based on their attendance, participation, ideas, initiative, teamwork, and how responsibly they handle assigned tasks throughout their tenure.

43) How do responsibilities and positions change when a new tenure begins?

With each new tenure, leadership positions and responsibilities are restructured, with members having opportunities to take on higher roles based on their contribution and performance.

44) Can I be a part of more than one domain at the same time in the club?

Yes. Members can be part of up to two domains at the same time, but they cannot switch domains during the same tenure. To join a different domain, they must go through the recruitment process of the new tenure.

45) What happens to ongoing projects and responsibilities when one tenure transitions to the next?

Ongoing projects and responsibilities are properly handed over to the incoming tenure, ensuring continuity. The new team is briefed on previous work, pending tasks, and relevant processes to carry them forward smoothly.

46) Which year students are eligible to join the Coding Ninjas 10X Club?

Students from the **1st, 2nd, and 3rd years** of college are eligible to join the Coding Ninjas 10X Club through the recruitment process.

47) What is the hierarchy or organizational structure of the Coding Ninjas 10X Club?

The Coding Ninjas 10X Club follows a hierarchy of **Members → Associates → Domain Heads → Board Members**, with each level taking on greater responsibilities in coordination, leadership, and decision-making.

48) How does a member progress through the club hierarchy?

A member can progress through the hierarchy by consistently contributing to the club, taking initiative, completing responsibilities, and demonstrating leadership and commitment, leading to opportunities for promotion to Associate, Domain Head, and higher positions.

49) What factors are considered when selecting members for higher positions?

Selection is based on consistent contribution, initiative, responsibility, teamwork, and leadership. Associates and Heads observe members' attendance, participation, ideas, and handling of responsibilities throughout their tenure.

50) What is the role of a Domain Head in the club hierarchy?

Domain Heads oversee their respective teams, set the direction and agenda for tasks, coordinate execution, and ensure that the domain works effectively towards the club's goals.

51) What is the role of an Associate in the club hierarchy?

Associates act as a bridge between Domain Heads and Members by helping communicate responsibilities, guide members, track progress, and support the execution of domain activities.

52) What is the role of a Member in the club hierarchy?

Members actively contribute to domain activities by taking up assigned responsibilities, sharing ideas, participating in discussions, and supporting the team in executing its tasks.

53) How much creative freedom do members have while working on themes, games, and event activities?

Members have creative freedom to suggest and develop themes, games, and event activities, as long as the ideas are practical, engaging, and can be executed with simple materials like A4/A3 sheets, charts, stationery, scissors, and tape.

54) How are themes selected for major club events, and what role do members play in suggesting them?

Themes for major club events are usually based on trending movies, series, video games, or major events that are currently popular and widely recognized. Members are encouraged to suggest creative, relevant, and engaging themes based on current trends.

55) What is the Coding Ninjas 10X Club's Instagram handle, and what is it used for?

Our official Instagram handle is **@srm_cn**, where we share **club updates, event announcements, recruitments, workshops, and activities, while also promoting events and initiatives from other clubs.**

RECRUITMENT

1. Who are all eligible to apply for recruitments?

All first and second years in SRMIST.

2. How does the recruitment process go on for non-technical domains?

The recruitment process begins with a Google Form application, followed by a personal interview for shortlisted candidates.

3. Can I share ideas for future club events during the interview?

Yes, absolutely. We encourage applicants to share their ideas and suggestions.

4. Can I apply again in the future if I am not selected this time?

Yes. You are welcome to apply in future recruitment drives.

5. What is the biggest mistake applicants make during interviews?

Being unprepared, lacking confidence, giving dishonest responses and usage of ai.

6. Can first-year students take up leadership roles later on?

Yes. Dedicated and active members can take on leadership roles as they grow within the club.

7. How are candidates evaluated during the recruitment process?

Candidates are assessed based on their communication, enthusiasm, problem-solving approach, and suitability for the selected domain.

8. I'm interested in the technical domains, but I'm still learning. Can I still apply?

Yes. We welcome learners who are eager to improve and contribute.

9. Can I apply for more than one domain during recruitment?

Yes. You can apply for multiple domains based on your interests and skills.

10. I'm interested in the technical domains, but I'm still learning. Can I still apply?

Yes. You don't need to know everything before applying. A strong willingness to learn, curiosity, and consistency are what we look for.

11. Will I get a chance to work on real projects after joining the club?

Yes. Members get opportunities to work on club projects, events, and collaborative initiatives.

12. Apart from organizing events, what else do club members get to do?

Members can participate in workshops, hackathons, technical sessions, networking events, collaborative projects, and skill-development activities.

CQ

1. What should participants bring on the event day for Campus Quest 5.0?

Participants should bring their college ID card and at least one laptop per team. Any additional requirements will be communicated by the organizers before the event.

2. How many members can be on a team?

Each team can have a maximum of 4 members.

3. Is prior coding experience necessary to participate in Campus Quest 5.0?

No. Basic coding knowledge is sufficient, and several rounds focus on logical thinking, teamwork, and problem-solving rather than advanced programming.

4. Are there prizes or certificates for winners of Campus Quest 5.0?

Yes. Winning teams will receive exciting prizes, and certificates will be provided to both winners and participants.

5. Where can I find further details about Campus Quest 5.0?

Updates regarding registrations, rules, and announcements will be posted on the club's official Instagram page @srm_cn.

6. Can team members be from different departments or years?

Teams can include students from different departments, but all members must be first-year students.

7. Can a team continue if one member has to leave midway?

Yes, the remaining members may continue the competition, provided they meet the event rules and organizer guidelines.

8. What happens if a team member arrives late to the event or venue?

Late arrivals may miss the briefing or the start of the event. Teams are advised to report on time, as delays may affect their participation.

9. How are ties resolved in the Campus Quest 5.0 leaderboard?

If teams are tied, factors such as completion time, checkpoint timings, and rule adherence may be considered to determine the final rankings.

10. How does Campus Quest combine coding, logical reasoning, and on-campus exploration into a single competition?

Participants solve coding challenges, crack logical puzzles, and navigate campus checkpoints, creating a unique blend of technical and adventure-based gameplay.

11. What makes Campus Quest different from a traditional treasure hunt?

Campus Quest isn't just about finding the next clue, it is about thinking, strategizing, and adapting. Participants navigate through the campus while solving coding and logical challenges, earning and utilizing virtual currency, and making real-time strategic decisions. The combination of technology, exploration, and competitive gameplay create an experience which is far more immersive than a conventional treasure hunt.

12. Can you explain the format and progression of the three rounds in Campus Quest 5.0?

The event begins with an elimination round, progressed to a campus-wide challenge involving strategy and problem-solving, and concluded with an intense final round where the top teams compete for victory.

13. For Campus Quest 5.0, if multiple teams arrive at the same checkpoint simultaneously, how is the order of participation decided?

Volunteers will manage the queue fairly, typically on a first-come, first-served basis, while ensuring that no team gains an unfair advantage.

14. Is Campus Quest an individual event or a team event?

Campus Quest is a team-based competition that emphasizes collaboration, communication, and collective problem-solving.

15. Why is Campus Quest conducted primarily for first-year students?

It helps freshers interact with peers, explore the campus, and experience technical events early in their college journey.

16. How does Campus Quest help new students become familiar with the campus?

By visiting different checkpoints across the university, participants naturally explore important locations while solving challenges.

17. What is the registration process for Campus Quest 5.0?

Teams can register through the official registration link released by the club. Registration is confirmed once all required details are submitted successfully.

18. Why is Campus Quest conducted before the club recruitments?

It introduces freshers to the club's culture, event management, and community, helping them understand what being a member is like before recruitment begins.

19. How does Campus Quest help me understand what the Coding Ninjas 10X Club is all about?

The event showcases the club's focus on innovation, teamwork, technical learning, and large-scale event execution through an engaging experience.

20. Will participating in Campus Quest give me an advantage during club recruitments?

Top 3 teams will be directly eligible for interview rounds during recruitments

21. If I enjoy Campus Quest, how can I become a part of the Coding Ninjas 10X Club?

You can apply during the club's official recruitment drive and participate in the selection process for your preferred domain.

22. Is Campus Quest meant only for competition, or is it also a way to meet new people and explore the campus?

It's both. Along with competing, participants get the opportunity to make new friends, work in teams, and become more familiar with the campus and the Coding Ninjas community.

23. Is there any registration fees for CampusQuest 5.0?

No, the event is completely free.
